Water:	70	Accom-Guests:	7
Range:		Accom-Crew:	
Location:	St. Louis, Missouri	Flag:	USA

This is a first class example of this very popular aft cabin yacht. This vessel has a large master stateroom and the spacious salon has the admired lower helm station option. The interior has been redecorated with tasteful wallpaper, carpet, etc... to make for an open and warm retreat. Indirect lighting throughout the boat and the two stereo systems can set a perfect mood in the evening. Power for cruising comes from the twin 454 Mercruiser engines that have been upgraded with an electronic fuel injection (EFI) system. This adds power, longevity and economy to these engines. Only synthetic oil has been used in the engines, which have only 880 hours. This boat is a "MUST SEE" for anyone trying to locate a superb freshwater aft cabin.

VESSEL WALKTHROUGH

Boarding either side two steps up to the spacious aft deck with isinglass enclosure. Forward and up steps to bridge with complete instrumentation and excellent visibility. There is additional seating for observers. Back on the aft deck, moving forward and down the steps into the salon the lower helm station is on the starboard side with the convertible love seat and an easy chair on the port side. Continuing forward you find the complete galley to starboard and the big U-shaped dinette to port. Forward of this is the guest head with shower. The washer/dryer is located here as well. With the guest head as a buffer, the privacy of the guest stateroom, forward is assured. Back in the salon and down the steps aft is the spacious master stateroom. The master head has a tub with shower. Numerous drawers and lockers provide storage not normally found in a boat of this size.
